Que. 62 **Direction: Read the passage given below and answer the question that follows:**

Communication is made up of more than just the words we use. It's maintaining eye contact with the person you're talking to, slouching on a video call, or your hand movements as you speak. Non-verbal cues such as tone of voice, gestures, and posture, all play their part. In this article, we define what body language is – and how you can interpret it to understand and communicate with people more effectively. Body language is the unspoken element of communication that we use to reveal our true feelings and emotions. It's the relaxed facial expression that breaks out into a genuine smile – with mouth upturned and eyes wrinkled. It can be a tilt of the head that shows you're listening, sitting, or standing upright to convey interest, or directing attention with hand gestures. It can also be taking care to avoid a defensive, arms-crossed posture, or restlessly tapping your feet. When you can "read" signs like these, you can understand the complete message of what someone is telling you. You'll be more **aware** of people's reactions to what you say and do. And you'll be able to adjust your body language to appear more positive, engaging, and approachable.
